

# M & M

LÁCTEOS

M&M Lácteos is a modern manufacturer based on the traditional cheese industry on the island of Menorca. This island tradition has been strengthened over more than three centuries, it knows how to give cheese a personality, cheese that has a unique flavour and texture.

The high quality of Menorcan cheese has its roots in the confluence of the Mediterranean climate, the careful selection of cattle, the richness of natural pastures and marine breezes. Together they create a high quality, prestigious, internationally recognised product.

But in addition to the natural factors and the artisan tradition is M&M's industrial and commercial initiative, and its drive to investigate consumer and professional needs, presenting new products in its wide and diverse range: grated cheeses, processed cheese, pieces presented in different sizes and formats, textures and characteristics. It is our pleasure to introduce our lactic products. We hope that they will be to your liking and that among the different presentations, you will find the product that most meets your needs and personal tastes.
